

The Hy-Line Advantage

Hy-Line W-80: The World's Most Sustainable Choice for High Egg Output

The Hy-Line W-80 is the world leader in egg numbers, feed conversion, and eggshell quality. Her combination of traits permits world egg producers to feed their local communities with nutritious egg protein while being responsible stewards of the planet's resources preserving them for future generations.

30-Year Genetic Gain on a Global Scale

1992 Management Guide for Prevailing White Variety vs 2021 Management Guide

LESS FEED CONSUMED SAVES

13 grams less feed to produce an egg compared to 30 years ago.

904,000 FEED TRUCKS

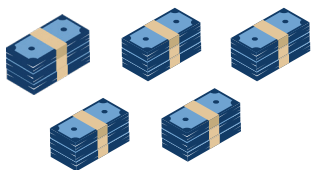

&

DRINKING WATER FOR 62 MILLION PEOPLE

Represents the cropland size of **Ireland** saved & eliminates **14.4 million metric tons** of CO₂ emissions annually.

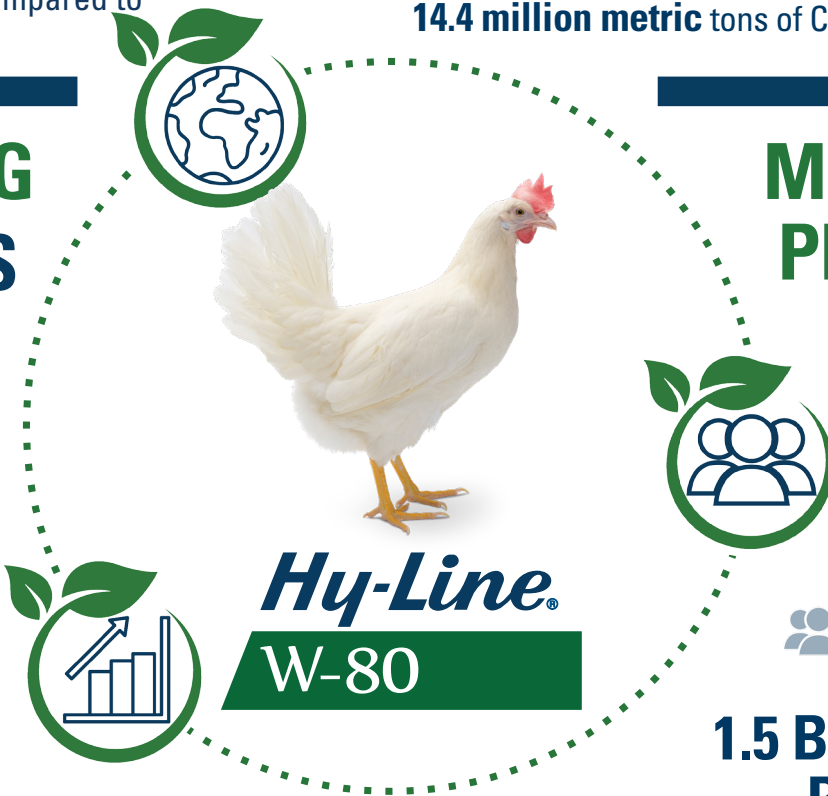

YIELDING PROFITS

\$5.00 NET INCOME PER BIRD

Pays for 1.3x the cost of the replacement pullet.

*More egg income over the cost of feed per hen-housed to 80 weeks of age.

Hy-Line W-80

MORE EGGS PRODUCED FEEDS

1.5 BILLION MORE PEOPLE DAILY

Represents more than the population of China.
